Subject: Report on prior market research results

The Croatian Academic and Research Network - CARNET has implemented a prior market research with the purpose of preparing the public procurement procedure for designing, implementing and maintaining a high-performance and scalable Moodle system as well as Moodle system interface redesign and user experience optimisation in the 2nd phase of the programme: "e-Schools – a comprehensive informatization of school operation processes and teaching processes aimed at the creation of digitally mature schools for the 21st century".

CARNET has presented the requirements for the above mentioned public procurement procedure and, with the purpose of procurement planning and preparation, has invited all interested parties to submit comments and suggestions together with the estimated value of all cost items using the enclosed cost statements in accordance with the listed requirements, by June 4, 2019 at the latest, to the e-mail address: e-skole-nabava@carnet.hr. Due to large interest from economic operators, the deadline for submitting comments and suggestions has been extended to June 12, 2019.

CARNET hasn't held any meeting with the economic operators during the prior market research phase.

Analysis of the submitted suggestions from the economic operators

A total of three economic operators have participated in the prior market research and have submitted cost statements.

CARNET has analysed the information submitted during the prior market research and it will be taken into account during the preparation of the public procurement procedure.
